# Stairs

Wherever the climb can be made easier, are ladders in stationary or mobile design a proven solution.

# Platforms, walkaways

## Walkways

Possibility to use on the wall or separately with a supporting structure.

## Moveable platforms

Mobile platforms for use at the airport, for example.

## Truck de-icing deck

For safety reasons, the removal of snow and ice has become the legal obligation on the planar roof of a truck.

We recommend a de-icing stage to prevent falling pieces of ice in traffic.

### Type 77-001 Truck de-icing deck

- possibility to extend the platform every 2.5 m
- possibility to order additional floorboards to increase the load capacity
- scaffolding construction made of quality aluminum
- floor of stairs and platforms made of galvanized steel
- the maximum load capacity of the platform is 300 kg and 150 kg on individual steps

Type	77-001
Stage length	5 m
Platform width	0,8 m
Stair inclination	45°
Step depth	270 mm
Platform height	3,2 m
Max. load	300 kg

# Movable stairs

## Movable stairs

The movable stairs are constructed for a safe and comfortable climb in warehouses.

Produced from special aluminum poles, with slide-proof steps, corrugated aluminum and double beams.

## Escalator with folding railings

Cross foot with steering brake rollers at the front if more than 11 steps.

## Special movable strairs

With an inclination of 45°. Cross foot with steering brake rollers at the front if more than 11 steps.

## Others movable stairs

# Overpasses

## Arch bridge

- ideal for events to cross roads or other obstacles
- quick and easy to open and dismantle

## Others overpasses

## Loading ramps

- capacity from 1700 to 7500 kg per pair
- length of 1.6 m to 5.5 m
- with and without protective edge

## Wine barrel ladder

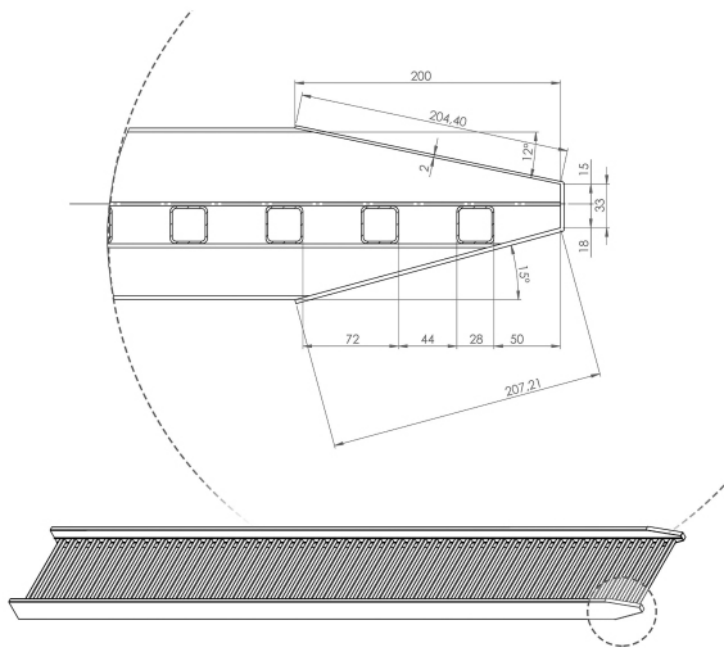

Once used in the harvest, the wine barrel ladder you don't want to miss it anymore. Specifically developed for side profiles are associated with very fluted rungs every 4 cm in the pulsed-arc welding process.

Special hooks allow for hooking up both the conventional trailer with tub as well as a wagon.

The rear sloping converging to a pointed side rails give additional grip to slide back while guaranteeing a slight move on without the dock.

And after the harvest time of harvesting bridge is used everywhere in your company, it was more than loading ramp, ramp, garbage ladder and much more!

Type	16-324	16-325	16-326
Number of rungs	55 ks	69 ks	83 ks
Length	4 m	5 m	6 m
Weight	28 kg	35 kg	41,5 kg
Inner light	0,5 m	0,5 m	0,5 m

## Loading or wheelchair ramp

Special designs on request.

# Special solutions

Special products such as airplane stairs, and window cleaning buckets are just some examples of the use – custom manufacturing. For these or other special application products are individually designed and manufactured according to customer requirements.

## Facade maintenance systems

Equipment for cleaning and revision of building facades. Convincing professional planning work and accurate observations have made Facade known throughout Europe.

### Facade cleaning system with pully platform

- for cleaning and overhaul of facades
- with hand and mechanical pully platform

### Facade cleaning system with stable platforms

- for particularly high versions (above 18 m height)
- every 2 m with platforms

## Hanging platform systems

Wherever you do not want tools for cleaning and / or revision to be visible, or where facades by using the level ladder cannot be achieved, we finish in roof overpass wagons in rollable or stationary design for receiving the suspended platform.

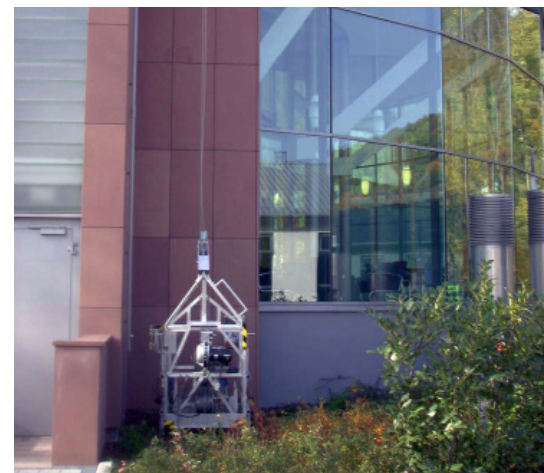

From simple hand-made crankable gondolas up to 5 meters long, electrically operated many people gondola the our team developed their solution.

### Hanging platform systems

For building types with the most difficult contours of the facade surfaces without problems can be easily cleaned.

When cleaning or maintenance work of more than one person must be carried out, this is more than an alternative.

## Rescue system

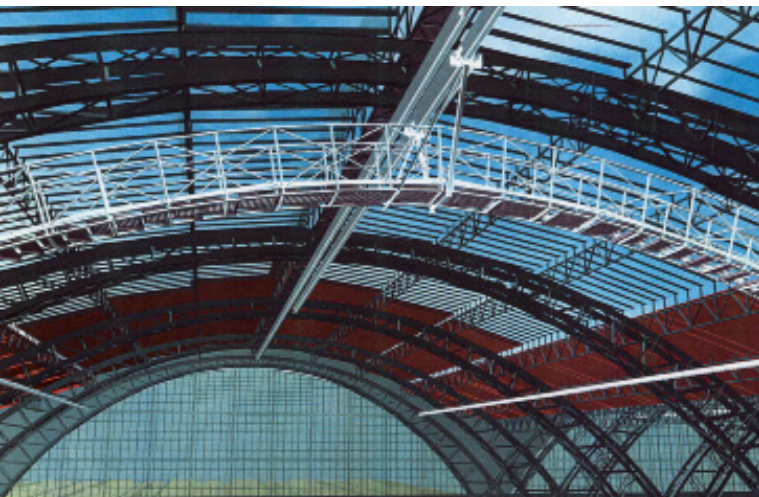

# Roof maintenance systems

## Sloping roof maintenance system

- even difficult roof configurations are no obstacles
- moving ladders are built from aluminum of up to 25 meters

## Bridge Overpass Systems

### Bridge overpass systems - straight

- all designs are standard with double-sided wheels, brakes and park security
- by way of powder coating the roof structures adapted to the system which merges with the object

### Bridge overpass systems - bent

- upon request, our systems will exactly match the roof radius
- the process of installation is made by hand if possible, but also carried out mechanically or electrically

## Gabled roof maintenance systems

- gable roofs also need to be serviced and cleaned
- our solutions reflect the ideas of clients and architects

## Dome maintenance systems

In various versions for:

- barrel roof
- pyramid roof
- dome roof

Works on all surfaces.

# Maintenance platforms

Whether in the aircraft, maintenance of aircraft or power plants - everywhere, where platforms are needed for relief work, our constructors can help.

## Other

Custom-made products, we developed for our clients:

- adjustable stairs with hinged railing
- cover for an indoor tree pot
- cart for railings
- 3 men crane basket
- 1 men crane basket
- special scaffolds for tunnels of the Viennese Subway

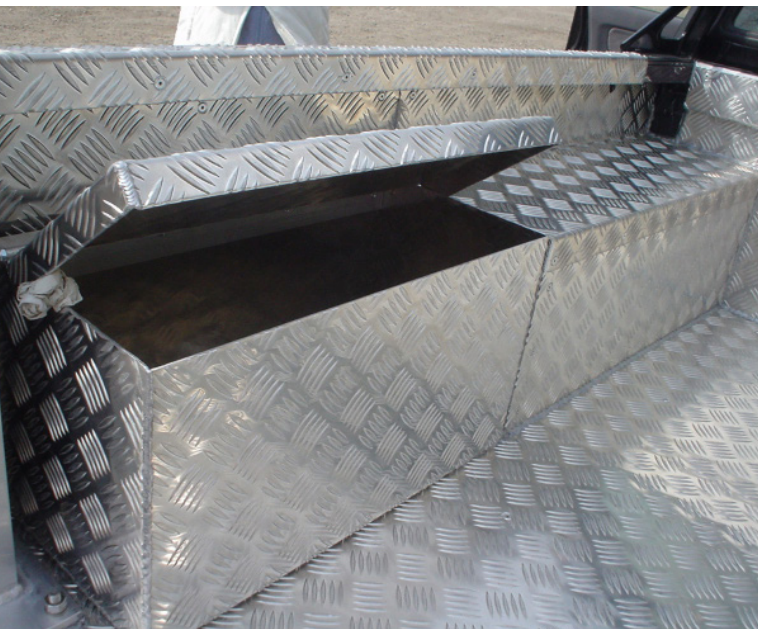

## Others products

### Aluminum - as creative as we are!

The versatility of aluminum as a working material proves the variety of products that can obtain. Here are some examples to look at.

### Car and platform covers for cars

In the field of motor vehicles, they offer products such as aluminum sheet coverings, tightly attracted tool cases, start-up meetings for SUVs and commercial vehicles and much more according to customer requirements.
